Quail Run Water Improvements Underway

The City of San Marcos has begun a water line construction project to incorporate the Diamond Pure water grid into the city's water system and to improve water service within the Quail Run, Sleepy Hollow, Deerwood Estates and Kingswood subdivisions.

Quail Run residents and property owners near the Oakridge water pump station at the end of Harmon's way will notice surveyors and construction crews in the area.

"This is an ideal opportunity to improve water service and enhance fire protection for area residents," states Jennifer Shell, P.E., Interim Director of Capital Improvements. "The Diamond Pure system was acquired in January 2008 and our new line from the Oakridge pumping station will provide the planned connection to the City water system."

Phase one of the Quail Run Water Replacement Project includes construction of 8,600 feet of 12-inch water line from the Oakridge

pumping station at the end of Harmon's Way to the Kingswood subdivision at the intersection of Quail Run and Hamilton Hollow. The project will also replace the existing 4-inch line that currently serves the Sleepy Hollow neighborhood from the Oakridge pumping station.

Rockin Q Construction, LLC of San Marcos was awarded the \$944,722 construction contract at the October 19 City Council meeting with LNV, Inc. of Austin providing project management and Civil Engineering Consultants of San Antonio providing engineering design. Project completion is expected in June 2011.

For more information on this project, call the Capital Improvements Department at 512.393.8130 or email cip@sanmarcostx.gov.
